## Protecting Artwork and Archives

PureAir systems provide highly efficient removal of urban pollutants. If left unchecked, these pollutants would degrade valuable works over time.

## Fume Abatement

PureAir systems capture fumes from printing processes and other applications where these fumes can cause discomfort or exceed recommended levels. PureAir provides broad-range adsorbents in these systems to capture virtually any reactive gas.

# Indoor Air Quality (IAQ) Solutions

## Odor Control

PureAir systems are installed in either the make-up air system, preventing odors from entering the building, or are installed in the exhaust, preventing odors from bothering neighbors.

## Case study:

### Google Electronics Protection

Google's large New York City data center office houses servers that are part of its global "Googleplex" of computers. Google installed the PureAir Side Access System (SAH) to protect circuits from pollution and ensure the reliability of the servers. The PureAir SAH, which met Google's facilities specifications, purifies external air before it enters the room, preventing wire and circuit corrosion.

### Christie's Fine Arts Storage

Christie's Fine Arts Storage Services provides climate-controlled high security for fine art, antiques, and collectibles. Requirements for the auctioneer's storage services include controlled air and top-of-the-line technology. To meet Christies' set airflow requirements, PureAir installed a Package Filter Unit (PFU), which re-circulates the air inside the storage center and super purifies urban air to protect precious items for long storage. The PFU was so successful that Christies wrote storage air specifications around it.

PureAir Filtration specializes in custom design solutions for a wide range of vapor phase air purification and contaminant control applications.

Proven technology is developed and applied by PureAir in order to provide efficient, cost effective systems. In-house laboratory, adsorbent production, and system fabrication facilities support PureAir's worldwide customers.

PureAir Filtration designs and builds complete systems to meet the demands of ANSI/ISA S-71 environmental standard for protecting electronics.
