

## Packaged Filter Unit (PFU) Self Contained, Compact Solution

The Pure Air Filtration Packaged Filter Units provide air purification for multiple applications in industrial and commercial facilities. These stand alone, vertical airflow units are also highly efficient and quiet. The standard PFU comes in three models with maximum airflows at 1000, 2000, or 3000 CFM. In addition, we offer even more compact models of the PFU, the PFU-Mobile & PFU-Mini, to meet the needs of customers with even the tightest space restrictions.

Benefits	Features
<b>Compact, yet Powerful</b>	Vertical, stand-alone airflow system 500 - 3000 CFM
<b>Highest Filtration Efficiency</b>	Positive seal to prevent air bypass & ensure removal of all unwanted gas molecules. Integral particulate filters. <b>Ask about our tools for monitoring air quality to ensure highest long-term performance</b>
<b>Quick Access, Low Maintenance</b>	Door to easily access internal parts & adsorbent media for maintenance & changeout
<b>Customizable</b>	Multiples sizes, configurations, & optional features. Can produce pressurization, recirculation, or both. Multiple options for media passes.
<b>Multiple Applications</b>	-Protect mission critical electronics -Improve air quality -Commercial & industrial odor control

### Capacities of PFU-Lite & PFU-Mini

Air Quality	Room Air Volume Capacity by Model	
	PFU-Mini	PFU-Mobile
<b>G2</b>	20000 ft3 (600 M3)	40000 ft3 (1200 M3)
<b>G3</b>	10000 (300 M3)	20000 ft3 (600 M3)
<b>GX</b>	5000 ft3 (150 M3)	10000 ft3 (300 M3)
