

## Basic Information

PureAir's Chemisorbant Media captures and removes problematic gases, vapors, and odors from the environment. PureAir's variety of media provide the most cost-effective and optimal solutions for each unique application.

### Defining the Problem

Determine which gas is causing the issue to identify the most effective solution.

Below are the main gases PureAir's Chemisorbant Media target:

- Ammonia
- Hydrogen sulfide
- Sulfur dioxide
- Nitric oxide
- Formaldehyde
- Chlorine

Note: Unsure of which gas is causing the problem? PureAir can help identify the problematic gases through experience and various tools, one of which is the Corrosivity Test Kit that identifies airborne corrosive gases.

### Media Types

Interested in a specific media? Ask the factory to send a specification sheet, which includes removal capabilities.

#### Activated Alumina Base:

- PureAir 4
- PureAir 8
- PureAir 12
- Alumina
- Safetysorb
- Siloxsorb

#### Clay and Mineral Base:

- PureAir Z
- PureAir 6Z
- Sulphasorb Fe™

#### Engineered Carbon Base:

- AC-C
- AC-X
- Ammoniasorb®
- NOXsorb
- Sulphasorb XL™
- Sulphasorb FeXL
- Sulphasorb 2™

#### Blended Media:

- PureAir CP Blend
- PureAir CPS Blend
- PureAir CPS12 Blend
- PureAir CPZ Blend
- PureAir PP Blend
- PureAir TriBlend
- PureAir VOCsorb Blend

### Media Filter Housings

Incorporate any media into these various housings and filters:

- Loose Media by the Box or Supersack
- PurePak (PP12/PP18) Modules
- Honeycomb Filters
- Pleated Media Filters
- Canisters

\*Ask the factory for more details on each of these options.

Made in the U.S.A.

# REPLACEMENT MEDIA

## Basic Information

Maintaining a system with high-performance chemisorbant media is crucial. If the media is not replaced when necessary, the system will fail to function properly, potentially releasing harmful gases into the environment. While the lifespan of the media varies depending on several factors, it typically lasts just over a year. Ensure optimal system performance with PureAir's top-quality media, proven through third-party testing.

## WHEN SHOULD MEDIA BE REPLACED?

There are a few ways to check a PureAir system and media.

The **Media Bed Indicator** performs as a dip stick in the unit. When the metal indicator is removed, discoloration will appear, indicating the corrosion level. When the discoloration reaches the halfway point, it is time to replace the media to ensure the system operates efficiently.

The **LIFEGARD™** alerts users before it is time for media changeout.

## SAMPLING MEDIA FOR LAB TESTING

Complimentary media testing is offered to all PureAir customers. The testing requires collecting a two-cup sample of media from each port of the system. As soon as the media is received, it is tested, and a report is created and returned detailing the remaining media life analysis.

## TESTING AIR QUALITY

A Corrosivity Test Kit can also be used, specifically for commercial and industrial applications, to test the quality of the air in the room and ensure the system is performing as intended.

The **Environment Corrosivity Monitor (ECMv2)** allows users to complete the corrosivity test electronically, through real-time monitoring.

## MEDIA SUBSCRIPTION PLAN

Interested in a customizable dedicated service package that includes automatic reorder of media at a discounted price? Inquire about PureAir's new media subscription plan.

**Tier 1:** Dedicated Virtual Assistance from a Sales Support Associate

**Tier 2:** On-site Consultation and Sales Support

**Tier 3:** On-site Consultation and Sales Support plus Electronic Monitoring

	Tier 1	Tier 2	Tier 3
Discount on future media orders	X	X	X
Free quarterly media testing; bags and labels will be sent each quarter	X	X	X
Sales support associate will send a reminder to check media bed indicator on a quarterly basis with instructions	X	X	X
Discount on future media orders and changeout service		X	X
A representative will come on site to check the media bed indicator and take samples on a quarterly basis. Mist and grease filter will be cleaned if needed		X	X
LIFEGARD™ reports will be provided			X
Other air quality monitoring will be provided as needed			X
